

Stay Informed, Stay Empowered:

UCR RAVE vs. UCR Safe APP

(RAVE) UCR Emergency Notification system
Official Emergency Alerts

The Official Emergency Alert System

The systemwide platform used for official, time-sensitive notifications during immediate threats.

Used for Life-Threatening Situations

Reserved for urgent events like active threats, fires, earthquakes, and evacuation orders.

Broad & Fast Notifications

Delivers critical alerts via push notifications, text messages, email, and voice calls.

While both systems are essential for campus safety, they serve different roles:

UCR RAVE is the high-priority emergency notification system for the entire UC network, whereas **UCR Safe APP** is a personal, interactive toolkit designed specifically for daily life at UC Riverside.

UCR Safe APP:
Your Personal Safety Hub

Daily Personal Safety Toolkit

A UCR-specific app featuring interactive tools like Virtual WalkHome and Friend Walk.

Direct Campus Connections

Provides Instant access to UCR Police, Mobile BlueLight, and anonymous tip reporting.

Built for Everyday Use

Best for walking on campus at night or accessing UCR-specific maps and procedures.

UCR (RAVE)	UCR Safe APP
Primary Scope	
 UC Systemwide	 UCR Campus Specific
Core Function	
 One-way Emergency Alerts	 Interactive Safety Tools
Frequency	
 Major Emergencies Only	 Every Day Use

STAY FULLY INFORMED AND EMPOWERED.

**UCR SOM also uses Rave as its primary emergency notification system, managed via SOM Facilities Planning to broadcast critical safety alerts, text messages, and emails during SOM specific emergencies or disasters.*
